Greetings!

The Learning House is hosting an Elegant Night of Chocolate Fundraiser on Saturday February 3, 2018 and we are looking for chocolatiers who want to showcase their talents and their chocolate confections. This event will be held at the Drake Center in Fort Collins from 7-9:00 PM.

An Elegant Night of Chocolate is for parents to dress up for a night of chocolate, wine, beer, and cheese tasting. We will also have a silent auction, live music and live presentations showcasing the talents of chocolate experts. There will be an amateur chocolate cake contest where the winner gets a fabulous prize; the prize is still to be determined.

We are looking for people like you to be a vendor at our event. The money raised will go to our Change for Children Tuition Assistance fund; we will never let money stand in the way of a child getting a quality early education. Would you be interested in helping us raise money for the school and showcasing your talents and products?

We are expecting approximately 200 adults to attend and we are offering 2 levels for vendors.

Level 1: We provide a 1-table booth at the event. Your company staffs the booth and provides samples for at least 100 people.

Level 2: We provide a 2-table booth at the event. Your company staffs the booth and provides samples for at least 100 people. Additionally, your business will be included in all our print and web marketing for this event and you'll be able to make direct sales. (Beer and wine vendors won't be allowed to sell. You can give out samples.) You are invited to make a 15-minute presentation during the night.

Can't make it and still want to have a presence?: You can send us a kit that includes marketing material for your company and samples for 100 people to hand out. We will have volunteers to staff your "booth".

The Learning House is Northern Colorado's only early childhood Science and Math school for children 3-8 years of age. We also facilitate therapeutic playgroups for infants and toddlers. During these groups, parents, stay, play, and learn about appropriate developmental growth. We don't provide any type of child care; children come to school, use cool scientific tools to explore their world, and then go home to further their exploration.

Your support would be greatly appreciated! We are excited about the opportunity this event provides our school. If you have any questions, please contact Jen Koerlin, coordinator, at 303-668-4103 or jenkoerlin@gmail.com.

Sincerely,
Jen Koerlin
